FLOODSENSE - Periodic review report (RP1)

Project: FLOODSENSE, GA [numero]
Review date: [data]
Reviewers: Reviewer 1, Reviewer 2
Project Officer: [nome]

Overall assessment

The project has made progress, but the evidence provided for several claimed results is insufficient. The consortium is requested to address the comments below within 30 days.

Comments requiring action

C1 (D3.2, Section 4). Results are described in qualitative terms only. No KPI baseline or measured value is reported. Please provide quantitative evidence against the KPIs defined in the DoA (Annex 1, Table 3.2).

C2 (D3.2, Section 5). The report states there are no significant deviations. However, MS4 was reported as achieved in month 12 while D3.2 is submitted in month 20. Please clarify and update the deviation section.

C3 (D3.2, Annex). The data and code availability annex required by the programme is missing. Please add it.

C4 (general). Dissemination activities listed in the periodic report are limited to conference participation. Please describe progress against the dissemination KPIs.

Recommendations

R1. Align the reporting of task progress with the task structure of the DoA.

R2. Provide a risk update for the remaining periods.
